

We consider ourselves Ireland's leading provider of Green Logistics Solutions, not just by our sentiment, but by our actions.

We strive to use all resources as efficiently as possible and to minimise waste. By adopting new technologies and methods, we aim to work to minimise our environmental footprint through improved processes and implementation of Energy A Rated LED lighting and the use of CNG vehicles in our operations.

We operate policies that support the recycling of cardboard and plastic; which is collected from our facilities by a professional recycling company which is certified by the Environmental Protection Agency (EPA).

All vehicles in our fleet are certified Euro 6 emissions and we use Ultra Low Sulphur Diesel which has a typical sulphur content of less than 0.004%.
